

Professional Summary

Master of Business Information Technology graduate from RMIT University with 3.5 years of experience in software testing, systems support, and project delivery within technology-driven environments. Skilled in system implementation, troubleshooting, data analysis, and technical documentation while collaborating with cross-functional teams to ensure smooth deployment and operational efficiency. Strong analytical problem solver with hands-on experience supporting system performance, monitoring operational data, and assisting in the delivery of technical projects.

Core Competencies

- **Business Analysis & Requirements Management:** Requirements Gathering & Elicitation, Business Process Analysis, Stakeholder Engagement, Functional & Non-Functional Requirements, User Stories & Use Cases, Gap Analysis, Process Mapping (As-Is/To-Be).
- **Data Analysis & Reporting:** SQL, Advanced Excel, Power BI, Data Analysis & Interpretation, Dashboard Development, Data Visualization, Business Insights & Reporting.
- **Systems & Process Improvement:** System Integration, Digital Platform Implementation, Business Process Improvement, Workflow Optimization, Data Mapping, ETL Concepts, System Configuration Support.
- **Testing & Validation:** User Acceptance Testing (UAT), Test Case Design & Execution, Defect Management, System Validation, Quality Assurance Support.
- **Tools & Technologies:** JIRA, Azure DevOps, Microsoft Office Suite (Excel, Word, PowerPoint), MS Visio, SQL Server, MySQL, Basic Python.
- **Project Delivery & Collaboration:** Agile & Waterfall Methodologies, Cross-functional Collaboration, Technical Documentation, Change Management Support, Implementation & Post-deployment Support, Issue Resolution.

Employment History

Store Business Manager.

7 Eleven, Melbourne, AUS

Oct 2025 – Current

- Managed daily store operations, including point-of-sale systems, inventory management, and supply procurement, ensuring smooth functioning of all store systems.
- Coordinated with vendors and internal teams for equipment maintenance and system updates, supporting operational readiness.
- Utilised PowerBI to track sales, inventory and operational metrics, assisting in data-driven decisions.
- Supervised and trained staff, ensuring compliance with operational procedures, safety and company policies.
- Implemented process improvements to enhance efficiency, including stock replenishment workflows and reporting accuracy.

Data Compliance Admin

MUFG Retirement Solutions, Melbourne, AUS

May 2025 – Aug 2025

- Reviewed and validated superannuation member requests and transactional data to ensure accuracy, compliance and adherence to regulatory standards.
- Performed data audits and system updates in Aspire, HP Record Manager and PEGA UCM to maintain data integrity and support reporting requirements.
- Analysed data trends and identified process improvement opportunities, supporting continuous enhancement of data quality, compliance processes, and operational efficiency.
- Collaborated with internal teams and fund representatives to resolve discrepancies, improve workflows and enhance data quality.

Test Analyst

TechNext Software Pvt Ltd, Chandigarh, India

Feb 2022 – Dec 2022

- Performed system testing and data validation, ensuring datasets were accurate, complete and compliant with requirements.
- Designed and executed test cases and SQL queries, validating system outputs, reporting and payment systems functionality, demonstrating experience in commissioning and testing processes.
- Collaborated with developers, BAs and product owners to identify defects, resolve system issues, and optimise workflow.
- Analyzed system data to provide insights for operational decision-making, supporting risk mitigation and trend analysis.

Quality Analyst (Software Delivery)

Suffescom Solutions, Mohali, India.

Aug 2021 – Feb 2022

- Provided post-delivery support and system testing, including API integrations, to ensure software functionality aligned with requirements and operational needs.
- Created and updated user stories and test scenarios based on customer feedback and change requests, supporting continuous system improvement.
- Collaborated with cross-functional teams (BAs, Product Owners, Designers, Developers, and Testers) to ensure timely and accurate delivery.
- Tested end-to-end customer workflows, including vendor onboarding and payment systems, identifying gaps and optimising user experience through data-driven insights and validation.

Testing Engineer

OPPO Mobiles India Pvt Ltd |Greater Noida, India

Oct 2019 – Aug 2021

- Conducted hardware-software integration and field validation for Android mobile devices, ensuring system reliability, functionality, and usability for end users.
- Performed firmware benchmarking and endurance testing to uphold product quality and performance standards.
- Automated 30% of regression testing using robotic scripting, improving test coverage and reducing turnaround time.
- Collaborated with R&D and software teams to triage defects, resolve technical issues, and optimise device performance.
- Documented test results and provided data-driven insights to support product improvement and decision-making.

Education

Master of Business Information Technology
RMIT University, Melbourne

Feb 2023 – Dec 2024

Bachelor of Technology
Punjab Technical University, Mohali
Electronics and Communication Engineering

Jul 2014 – Aug 2018

Projects

Hybrid Predictive Model for Urban Service Delivery
RMIT University, Melbourne

- Objective:** Developed a hybrid LSTM-DBSCAN model to predict NYC non-emergency service demand and analyse spatio-temporal patterns for optimised resource allocation.
- Tools:** Azure Machine Learning Studio, Python (pandas, scikit-learn), LSTM, DBSCAN, MS Office, Agile methodologies.
- Duties:** As Business Analyst, gathered and translated stakeholder requirements into functional specifications for the predictive model. Collaborated with cross-functional teams to define **business needs, data requirements, and success metrics**. Facilitated **process mapping** (As-Is/To-Be), supported data analysis, and ensured alignment between technical solutions and business objectives. Coordinated User Acceptance Testing (UAT), validated outputs, and ensured the solution met performance and usability expectations.
- Outcome:** The team successfully deployed a system that forecasts next-day service demand and identifies spatial clusters, enabling actionable insights and improved operational efficiency. Achieved High Distinction and presented findings to an academic panel.
-

AI-Powered Chatbot for WIL Team
RMIT University, Melbourne

- Objective:** Developed an AI-powered chatbot to streamline the Work-Integrated Learning (WIL) process, providing real-time support to students and staff while automating responses to common queries.
- Tools:** Microsoft Copilot Studio, Azure Cognitive Services, Power Automate, MS Office, MS Visio, Agile methodologies.
- Duties:** As Business Analyst, elicited and documented stakeholder requirements to design an AI-powered chatbot solution. Collaborated with users to define **workflows, user journeys, and functional requirements** aligned with business goals. Developed **process maps, supported implementation**, and ensured solution alignment through continuous feedback. Conducted UAT, monitored performance, and recommended improvements to enhance user experience and operational efficiency.
- Outcome:** Successfully deployed a functional chatbot that handles student and staff inquiries, automates administrative tasks, and provides actionable insights to improve the WIL program. Received positive academic recognition for effective design and presentation to the university panel.
-

Personal Attributes

- **Strong analytical and problem-solving skills:** Identified and resolved complex integration issues across multi-vendor platforms, improving system reliability by 25%, demonstrating adaptability and resilience under pressure.
- **Excellent stakeholder management and communication:** Communicated clearly and effectively with diverse stakeholders through workshops, UAT sessions, and cross-team collaboration in Agile environments.
- **Agile delivery experience:** Actively participated in daily stand-ups, sprint planning, retrospectives, and requirement refinement, fostering teamwork and collaboration.
- **Detail-oriented with regulatory awareness:** Ensured compliance with service standards and regulatory requirements across financial services and telecommunications projects, showing reliability and professionalism.
- **Continuous learning mindset:** Successfully transitioned from manual to automation testing and self-initiated upskilling in modern BA and testing tools, demonstrating leadership presence and a commitment to improvement.
- **Time management excellence:** Balanced full-time postgraduate studies at RMIT with part-time work, consistently meeting academic and project deadlines.
